

# Back to School

## BE WISE AND IMMUNIZE

Back to school is the perfect time to make sure your children are up to date with their vaccines!

Vaccination protects students from diseases and keeps them healthy. When children are not vaccinated, they are at an increased risk of disease and can spread these diseases to others in their classrooms and community—including babies who are too young to be fully vaccinated, and people with weakened immune systems due to cancer and other health conditions.

For more information, including the types of vaccines needed, visit: <https://www.cdc.gov/vaccines/growing/school-vaccinations.html>
